

Asset accountant

Be an asset to our organisation!

This role will give you the opportunity to get involved and work with groups as diverse as transport and property to the zoo!

Your excellent relationship building ability will be beneficial when liaising with business partners in regards to their asset related systems and financial information. You will build rapport and in doing so, develop an understanding that will ensure consistently high quality information. Your confident manner and attention to detail will be advantageous when working with colleagues to budget depreciation and analyse asset data.

Your systems focus and logical mind will aid you helping to continuously improve our asset systems. The information obtained will form part of the annual plan and annual report, allowing you to enjoy a sense of achievement. A meticulous approach such as yours will quickly make you an expert in our asset systems.

An ability to multitask under pressure whilst producing high quality work will be recognised in this role. Ideally, you will have a minimum of four to five years experience in the finance area of a large commercial or local government organisation and have a tertiary business qualification, such as a Bachelor of Commerce or a related discipline. Experience in applying accounting processes and standards is a requirement as is a strong knowledge of financial management information systems.

This is a great opportunity to develop your career and feel valued within a large organisation.
