Emergency E-Learning: A Study on the effects of the transition to online learning

The current COVID-19 restrictions in place for 2020 and 2021 are being investigated in terms of the changing environment academics were forced into due to stay at home orders, where they entered into emergency e-learning, from home.

The effects of emergency e-learning on academics' workloads, job satisfaction and motivation, as well as overall wellbeing have yet to be investigated and reported. It is hoped this survey will shed some light on the challenges and opportunities accounting and finance academics faced during lockdown teaching.

Sustainable Development Goals (SDGs) and sustainability accounting: Opportunities and Challenges for public, non-governmental and hybrid sector organisations

Special issue call for papers from Journal of Public Budgeting, Accounting, and Financial Management

What is this special issue about?

The adoption of Sustainable Development Goals (SDGs) by the United Nations in 2015 has been a well-received and globally accepted iteration of the sustainable development agenda (Abhayawansa et al., 2021; Adams et al., 2020; Bebbington and Unerman, 2018). With 17 holistic goals and 169 targets, the SDG agenda aspires to stimulate action in areas that are of critical importance for humanity and the planet including hunger, poverty, inequality, health and well-being, clean energy and quality education (United Nations, 2015). Given the critical importance of SDGs, this initiative has drawn considerable attention in the policy debate and research. A number of conceptual studies have set the agenda and directions for advancing and achieving SDGs and the role of accounting and finance therein. However, little is known about how organisations, especially in the public, non-governmental and hybrid sectors are addressing and implementing the SDG goals and targets, and account for sustainability performance
